Reviews

It is really an remarkable book which i have ever go through. It can be writter in simple terms and not difficult to understand. I am just effortlessly can get a enjoyment of reading a composed pdf.

Book Condition: New. Publisher/Verlag: Springer, Berlin | This comprehensive introduction to the theory and applications of polarizational bremsstrahlung has been prepared by leading experts to provide graduate students with a functional understanding of a high-profile sector with enormous practical potential. | This book introduces and reviews both theory and applications of polarizational bremsstrahlung, i.e. the electromagnetic radiation emitted during collisions of charged particles with structured, thus polarizable targets, such as atoms, molecules and clusters. The subject, following the first experimental evidence a few decades ago, has gained importance through a number of modern applications. Thus, the study of several radiative mechanisms is expected to lead to the design of novel light sources, operating in various parts of the electromagnetic spectrum. Conversely, the analysis of the spectral and angular distribution of the photon emission constitutes a new tool for extracting information on the interaction of the colliding particles, and on their internal structure and dynamical properties. Last but not least, accurate quantitative descriptions of the photon emission processes determine the radiative energy losses of particles in various media, thereby providing essential information required for e.g. plasma diagnostics as well as astrophysical and medical applications (such as radiation therapy). This book primarily addresses graduate students and researchers with a background in atomic, molecular, optical or plasma physics, but will also be of benefit to anyone wishing to enter the field. | Introduction.- Bremsstrahlung in Collisions of Structureless Charged Particles with Atoms and Ions.- Polarizational Bremsstrahlung in Collisions With Hydrogen Atom.- Cross Section of PBrS From Many-Electron Atoms and Ions.- PBrS in Non-Relativistic Collisions of Structural Particles with Atoms and Ions.- Relativistic Effects in the Polarizational BrS Process.- PBrS From Atomic Clusters and Fullerenes.- Conclusion.- References. | Format: Hardback | Language/Sprache: english | 573 gr | 232x148x20 mm | 275 pp.
